![AJ Grant IT — Simplifying IT]

Managed Cloud Backup

Why Choose AJ Grant IT

Savings
We can typically save businesses 20% of their current IT costs, assuming use of the same high grade of equipment, facilities and services.

Focus
You can focus your energy on developing your core business and let us seamlessly manage your cloud technology.

Cost Restructuring
By leveraging this subscription-based solution, you can also make your current, IT-related capital expenditures become operating expenses.

Talent
AJ Grant IT provides a full-service desk team, field support specialists, NOC engineers and management team that collectively serve as your 'IT Department.'

Operational Expertise
We employ industry best practices, guidelines and methods that follow international standards to ensure consistent, high quality IT operations for our clients.

Scalability
Our Cloud Solutions can scale out rapidly to any size suitable for our clients.

Backup for every eventuality

We hope you'll never need your backup, but if you do, we'll make sure that restoring your business to normal working order is as smooth a process as possible.

At AJ Grant IT we provide IT backup solutions for businesses in a huge range of industries, with diverse security requirements, operating with both traditional and cloud-based IT.

What we're trying to say is: we're here to back you up.

Backup is one thing you don't want to spend time worrying about. You just want to know that it works and that it's in safe hands. That is precisely what AJ Grant IT Managed Cloud Backup delivers. Your backup is fully automated and happens overnight so it doesn't get in the way. Every morning it gets checked by AJ Grant IT. If there are any issues, our engineers are there to sort them out.

Advanatages of cloud backup over traditional backup services

AUTOMATIC
The backup is fully automated and requires zero effort

SECURE
Your data is encrypted before it leaves your computer

OFFSITE
You don't have to remember to take tapes offsite. This is an essential component of your disaster recovery plan

GLOBAL ACCESS
You can restore from any Internet-connected computer

EASE OF USE
Self-service restore of lost/deleted files
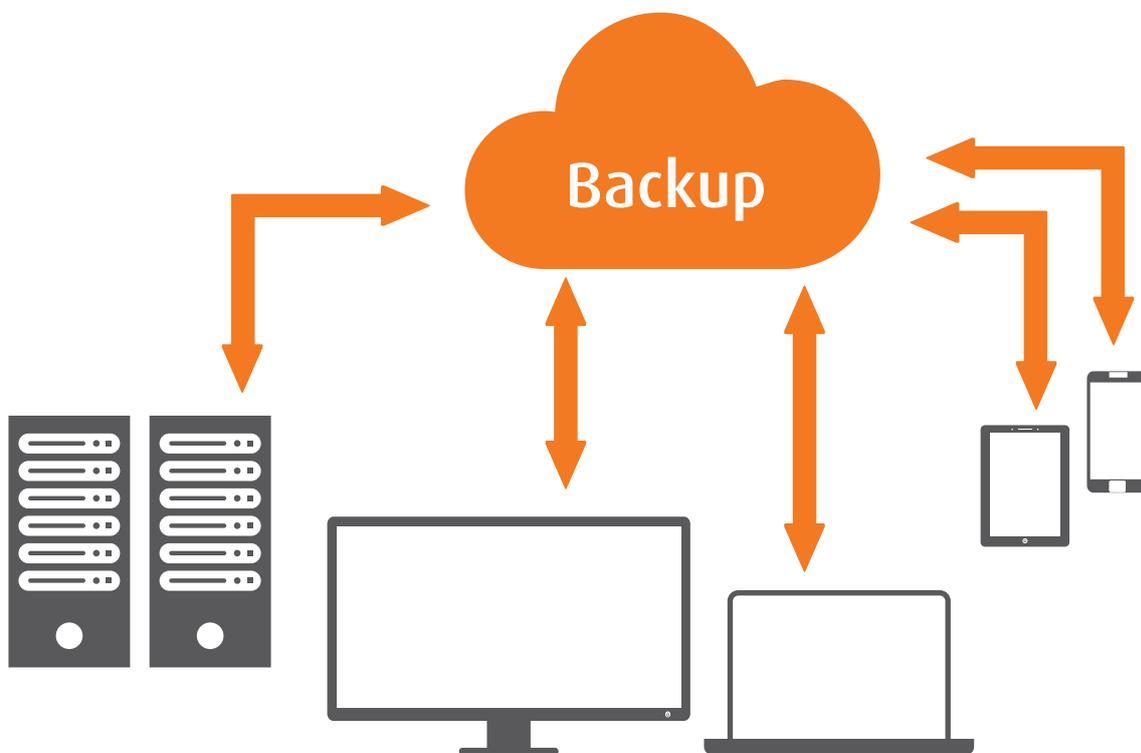

CENTRAL CONTROL
As part of a support contract, Riverbank monitors backups of your servers, remote laptops etc

NO CAPITAL COST
It requires no expensive hardware or tapes that wear out

Managed cloud backup means when you need to recover your data you can do so from anywhere, any time. And because it is supported and managed by AJ Grant IT, your backup is secure.

All data is encrypted before it leaves your office and all data is stored in highly secure and resilient Australian data centres. Because it is designed for complex professional environments, you can be confident that your backup is protecting your data effectively and efficiently.
